Dice Rolling	2
HP & Healing (Player)	4
Character & Profile	5
Config & Maintenance	6
Fight System	7
Merits & Ranks	10
Quest Board	11

Dice Rolling

Type dice notation directly or use any prefix style (r, !r, !roll):

<code>1d20</code>	(bare notation — no prefix needed)
<code>r1d20+5</code>	
<code>r1d20+5 atk</code>	(label shows in bold above result)
<code>r1d20+5 <i>atk</i></code> <code>[flavour text on next line]</code>	(supports <i>italic</i> and bold)

Advantage & Disadvantage

<code>ra1d20+5</code>	(rolls twice, takes higher)
<code>rd1d20+5</code>	(rolls twice, takes lower)

Rerolls (Player)

<code>rr</code>	(costs 1 token)
<code>rra</code>	(reroll with advantage)
<code>rrd</code>	(reroll with disadvantage)

Shorthand: append a reroll set to a stat — **strrr**, **dexrra** (adv), **conrrd** (dis) — to reroll your last roll. A label may follow: **strrr atk**.

Guided Roll (/roll)

<code>/roll stat:Strength</code>	(pick a stat from the dropdown)
<code>/roll stat:Wisdom mode:Advantage</code>	(advantage / disadvantage)
<code>/roll dice:2d6+3 label:damage</code>	(custom notation instead of a stat)
<code>/roll stat:Dexterity success_check:true</code> <code>label:sneak flavour:*slips into shadow*</code>	(label + RP text)

Every part of **/roll** is a dropdown or field — stat, advantage, success check, label and RP flavour — so nothing has to be memorised. Choose either a **stat** (rolls 1d20 + that stat from your sheet) or custom **dice**. The result uses the same card as a typed roll.

Stat Quick Rolls

<code>str con dex wis lck</code>	(r prefix optional · add a label e.g. str atk)
<code>wisa dexd</code>	(stat roll with advantage / disadvantage)

Rolls 1d20 + that stat from your saved character. Type the stat on its own (no prefix) or keep the **r** prefix. Add **a** for advantage or **d** for disadvantage — **wisa**, **dexd**.

? Success Check Rolls

Prefix ? instead of r to get a success outcome:

?1d20+5 ?ra1d20+5 ?rd1d20+5 ?rr ?str ?wisa

Result	Outcome
Natural 20 / max face	Critical Success (gold)
Natural 1 / min face	Critical Fail (red)
Total 15+	Success
Total 10-14	Partial Success
Total 2-9	Fail

Critical Hits & Fails (all rolls)

Natural max on any die → gold label + result.

Natural 1 on any die → red label + result.

HP & Healing (Player)

!hp +5

!hp -3

Heal (White Knight + WIS 5 only)

Targets another player — cannot self-heal.

!heal @user

!h @user

Roll Result	Effect	Charges Used
Natural 20	+2 HP restored	None
20+ (modified)	+2 HP restored	1
2 - 19	No heal	1
Natural 1	No heal	2

Rest Commands (Player)

Append **@user** to any command for Game Master targeting. Default amounts shown — Game Masters can change them with **/config rest**.

Command	HP	Rerolls	Heal Charges
lrest	Full	Full	Full
srest	Half	—	—
hpfull	Full	—	—
hphalf	Half	—	—

Short rest restores HP only by default. A Game Master can re-enable rerolls/heal or change any amount.

Character & Profile

Stats

<code>/char set field:str value:14</code>	
<code>/char set field:con value:12</code>	<i>(HP auto-maxes to CON + 2)</i>
<code>/char set field:lck value:3</code>	<i>(rerolls auto-max to LCK)</i>

Knight Orders

<code>/char set field:order value:White Knight</code>	<i>(also: Black, Gold, Grey, Blue,)</i>
<code>/char set field:order value:Red Knight</code>	<i>(Purple, Green, Red)</i>

Class, Weapons & Emojis

<code>/char set field:class value:Hero</code>	<i>(Hero / Vanguard / Defender / Siege Knight)</i>
<code>/char set field:weapon1 value:Longsword</code>	
<code>/char weaponemoji slot:Weapon 1 emoji:[choose]</code>	<i>(standard emoji dropdown)</i>
<code>/char weaponemoji slot:Weapon 1 custom::sword:</code>	<i>(paste a server emoji)</i>

Pick a standard emoji from the dropdown, or paste a server custom emoji in the “custom” field (it overrides the dropdown). The image export falls back to a sword glyph for custom emojis.

Bulk Setup & Export

<code>/char create str:14 con:12 dex:10 wis:5 lck:3 \</code>	<i>(everything at once)</i>
<code>order:White Knight class:Hero \</code>	
<code>weapon1:Longsword weapon2:Tower Shield</code>	
<code>/char show</code>	<code>/char show user:@player</code>
<code>/char export</code>	<code>/char export format:Image</code>

Profile

<code>/profile on</code>	<code>/p on</code>	<i>(enable embed, max HP + rerolls)</i>
<code>/profile off</code>	<code>/p off</code>	<i>(disable embed, plain text rolls)</i>
<code>/profile show</code>	<code>/p show</code>	<i>(preview card without rolling)</i>
<code>/profile save mysave</code>		<i>(snapshot current state)</i>
<code>/profile load mysave</code>		<i>(restore snapshot in any channel)</i>

Sheet Import

Paste an exported sheet into any channel the bot watches.

<code>[paste sheet into channel]</code>	<i>(player)</i>
---	-----------------

Config & Maintenance

Help & Maintenance

<code>/help</code>	<i>(overview of all command groups)</i>
<code>/help category:dice</code>	<i>(detail on a specific group)</i>
<code>/lastroll</code>	<i>(recall your last roll in this channel)</i>

Derived Stats

Stat	Formula	On change
Max HP	CON + 2	HP always maxes
Max Rerolls	LCK	Rerolls always max
Heal tracker	White Knight + WIS $\geq$ 5	Appears / disappears automatically

Fight System

Structured fights with initiative, turn order, stat-based rolls and damage tracking.

Commands

<code>/fight start players:@a @b npcs:Goblin, Orc</code>	<i>(any number of each)</i>
<code>/fight start ... manual:true</code>	<i>(skip roll, keep listed order)</i>
<code>/fight atk stat:str target:@user</code>	<i>(attack a player)</i>
<code>/fight atk stat:str target_npc:Orc</code>	<i>(attack an NPC)</i>
<code>/fight def stat:dex</code>	<i>(defend)</i>
<code>/fight rr</code>	<i>(reroll last fight roll — 1 token)</i>
<code>/fight resolve</code>	<i>(resolve the exchange)</i>
<code>/fight status</code>	<i>(show turn order and HP)</i>
<code>/fight log</code>	<i>(re-post the last finished fight's recap)</i>
<code>/fight forfeit</code>	<i>(concede — HP preserved)</i>

How a Fight Runs

When a fight starts, the bot rolls DEX initiative (1d20 + DEX) for every fighter and orders the turn order from highest to lowest, ties broken by the raw d20. Add **manual:true** to skip the roll and keep your listed order, or use **/fight order** with a comma-separated sequence.

Knocked-down fighters: anyone at 0 HP or less is left out when a fight starts or when NPCs are added, with a warning naming them. Restore NPCs with **/npc heal** or **/npc hp**, players with rests or **hpfull @user**.

HP stays in sync: any mid-fight HP change — **!hp**, **!heal**, rests, **/npc hp** or the **/fight hp** command — is mirrored straight into the fight, so a heal is never overwritten by the next exchange. Anywhere a command takes NPC names, **category:Name** adds a whole category at once. When a fight ends — by victory, forfeit, kick or **/fight end** — a recap posts each fighter's damage dealt and taken, natural 20s and 1s, and rerolls spent.

Damage

Situation	Damage
Attack total $\geq$ Defence total	1
Attacker natural 20	+1 bonus
Defender natural 1	+1 bonus
Attacker nat 20 + Defender nat 1	4 total
Defence total > Attack total	0 (blocked)
Fighter reaches 0 HP	Knocked down, removed from turn order, HP goes negative

Players can reroll using **rr** / **rra** / **rrd** after their initial roll before **/fight resolve**.

Critical Effects (carry-over)

A natural 1 or natural 20 leaves a mark on the *next* roll, in both manual and auto fights:

Trigger	Effect on the next roll
Natural 1 on an attack	The attacker fumbles — their next defence is rolled as a flat d20 (no stat, no advantage).
Natural 20 on a defence	The defence turns the blow aside and the defender gains +2 on their next attack — unless that attack was itself a natural 20.

Each effect is consumed by the affected fighter's next matching roll and is announced when it lands ("presses the riposte", "defends on a flat d20"). Leaving a fight clears any pending effects.

Merits & Ranks

A milestone-style progression system. Merits are a lifetime tally a Game Master awards; ranks are named tiers with merit thresholds. The bot tracks progress and flags eligibility, but every promotion is decided by a Game Master.

Merits

<code>/merit view</code>	<i>(your merits, rank, and merits to next rank)</i>
<code>/merit view user:@player</code>	<i>(view another player)</i>
<code>/merit leaderboard</code>	<i>(top earners on the server)</i>
<code>/merit history user:@player</code>	<i>(a player's merit timeline)</i>
<code>/merit history</code>	<i>(recent server-wide merit activity)</i>

Ranks

<code>/rank list</code>	<i>(all ranks and their thresholds)</i>
-------------------------	---

/merit view shows current merits and exactly how many more are needed for the next rank, e.g. “Knight · 7 merits · 8 to Paladin”. Every merit change is recorded — quest rewards show the quest name, manual changes show “by GM” — so **/merit history** answers “who earned what, and when”. Removing a rank doesn’t change players who already hold its label.

Quest Board

GMs create quests with lore, objectives, details and rewards. Quests are posted as a message with an Apply button and also appear on the board. Players apply, a Game Master approves the party, and on completion merits are auto-awarded while other rewards are listed for the Game Master to hand out.

For Players

<code>/quest board</code>	<i>(list quests (filter: open/active/completed/all))</i>
<code>/quest show number:1</code>	<i>(full details of one quest)</i>
<code>/quest roster number:1</code>	<i>(see applicants and the party)</i>
<code>/quest apply number:1</code>	<i>(apply to join — or tap Apply on the post)</i>
<code>/quest withdraw number:1</code>	<i>(leave or cancel your application)</i>
<code>/quest log user:@player</code>	<i>(completed quests a player was on)</i>

Quests are auto-numbered for easy recall, e.g. **#001-Goblin Cave** (repeatable quests keep the name and get a fresh number each time). Party size is a hard cap or a suggestion — the Game Master chooses with **hard_cap**, and **force:true** on approve overrides a cap. Point a quest at a thread with **/quest runchannel** and its completion rewards are announced there.

Penned by the DDice Scriptorium · May your rolls be ever in your favour
